

## BOIL WATER NOTICE

To ensure water quality, the firm Aquatech, which is responsible for drinking water treatment, rigorously monitors water quality across the entire network using multiple analyses. Everything is done in compliance with the requirements and standards of the ministère de l'Environnement et de la Lutte contre les changements climatiques ainsi que de la Santé publique.

Major repair work on des Pins and de la Plaisance Streets on the aqueduct network required temporary water supply connections. Following compliance tests on these connections, we were obliged to issue a boiling water advisory.

We are still waiting for analysis results from a certified laboratory before being able to lift this notice.

The situation is monitored very closely on a daily basis and the boil water advisory may be lifted as soon as several analyzes taken by a certified laboratory confirm that the water is drinkable and meets the quality standards in force.

Drinking water tanks are available to citizens and merchants in the parking lot of the municipal garage located at 80, rue Cyr.  
We invite you to bring your containers.

We apologize for any inconvenience caused by this operation and thank you for your understanding.

Given in Bedford this, October 3, 2023

Richard Joyal  
General manager
